Collusion is the switch the message caused: B in frame 1, A in frame 3.

What a monitor sees, and what it concludes

Only the action (3)	**Action + message (2, 3)**	**+ what it did before (1), or on similar cases**
cannot tell whether the message caused it	flags agents that refused the offer too	**sees the switch: FLAG. Our proposed standard**

Illustrative episode. Agents: Gemini 2.5 Flash, Qwen3-8B. Monitors: Mistral Small 3.1 24B, Claude Haiku 5.5.
